Patrice L. Spath, MA, RHIT, is a health information management professional with broad experience in health care quality and safety improvement. She is president of Brown-Spath & Associates (www.brownspath.com), a health care publishing and training company based in Forest Grove, Oregon. During the past twenty-five years, Patrice has presented more than 350 educational programs on health care quality and patient safety topics and has completed numerous quality program consultations for health care organizations.

Ms. Spath has authored and edited many books and peer-reviewed articles for Health Administration Press, AHA Press, Jossey-Bass, AHC Media LLC, Brown-Spath & Associates, and other groups. Her recent books include Engaging Patients as Safety Partners (AHA Press, 2008) and Leading Your Health Care Organization to Excellence (Health Administration Press, 2005) for which she received the James A. Hamilton Book of the Year Award. This award is given annually to the author of a management or health care book judged outstanding by the American College of Healthcare Executives’ Book of the Year Committee.

Ms. Spath is an adjunct assistant professor in the Department of Health Services Administration at the University of Alabama, Birmingham, where she teaches online quality management courses. She has also had teaching responsibilities in the health information technology program at Missouri Western State University in St. Joseph and the graduate health administration program at Montana State University in Billings.

Ms. Spath currently serves as consulting editor for Hospital Peer Review and is an active member of the advisory board for WebM&M (http://webmm.ahrq.gov), an online case-based journal and forum on patient safety and health care quality that is supported by a contract from the Agency for Healthcare Research and Quality.
Richard J. Croteau, MD, is a senior patient safety advisor at Joint Commission International with a principal focus on international patient safety activities in collaboration with the WHO’s World Alliance for Patient Safety. For the past twenty years, he has held several positions with The Joint Commission including executive director for patient safety initiatives and vice president for accreditation services. Earlier activities include chief of surgery at South County Hospital in Rhode Island and rocket systems analyst for NASA’s Lunar Module program, Project Apollo. He currently splits his time between international patient safety activities and woodworking.

Yosef D. Dlugacz, PhD, is the senior vice president and chief of clinical quality, education and research of the Krasnoff Quality Management Institute, a division of the North Shore-Long Island Jewish Health System which was the recipient of the National Quality Forum’s 2010 National Quality Healthcare Award. Dr. Dlugacz was instrumental in designing the impressive and sophisticated quality management structure that integrates quality management methods into every level of care within the vast 15-hospital system. His latest book, Value Based Health Care: Linking Finance and Quality (Jossey-Bass, 2010), explores the relationship between quality care and organizational efficiency.

Sanford E. Feldman, MD, FACS, a general surgeon in private practice in San Francisco, was a pioneer in the area of medical peer review. He was a founder and first director of the San Francisco Medical Peer Review Organization and became director of the California Medical Review Organization. After retirement from surgery Dr. Feldman continued to work for the improvement of patient care. He was an expert in the assurance of quality care by hospitals and wrote about physician and hospital error for various medical journals. Dr. Feldman passed away in 2008 at the age of 93.
THE AUTHORS

Karen Ferraco was a risk management consultant at ProNational Insurance Company in Okemos, Michigan, and at PHICO Insurance Company in Pennsylvania. She specialized in risk management with an emphasis on professional and hospital liability. Ms. Ferraco was frequently involved in training and educational presentations for medical professionals and medical staff and hospital boards. In addition to her strengths in analyzing high-risk exposures, she practiced as a registered nurse for 10 years. Ms. Ferraco passed away in 2002 at the age of 55.

Susan T Goodwin, RN, MSN, CPHQ, FNAHQ, FACHE, is assistant vice president in the Clinical Services Group for the Hospital Corporation of America (HCA) and currently concentrating on the development and redesign of credentialing, privileging, and peer review systems and processes for HCA affiliates. Ms. Goodwin is the 2011 president of the National Association of Healthcare Quality (NAHQ), and most recently served as chairman and NAHQ representative for the Joint Commission’s Professional and Technical Advisory Committee for the Hospital Accreditation Program.

Robert J. Latino is CEO of Reliability Center, Inc. (RCI) (www.reliability.com). RCI is a reliability consulting firm specializing in improving equipment, process, and human reliability. He has facilitated root cause analyses and failure mode and effect analyses with his clientele in more than 20 countries around the world for 25 years and has taught more than 10,000 students in the PROACT® methodology. Mr. Latino is the author of Root Cause Analysis: Improving Performance for Bottom Line Results (2006, Taylor & Francis) and Patient Safety: The PROACT Root Cause Analysis Approach (2008, Taylor & Francis) as well as coauthor on several other patient safety articles and publications.

Danielle Lavallee, PharmD, PhD, is the senior health care consultant for Lean Hospitals, LLC (www.leanhospitals.org). Her work and research focuses on improving the efficiency of health care practices through the incorporation of lean principles and she is a Lean Hospitals Certified Six Sigma Black Belt. Dr. Lavallee holds degrees of doctor of pharmacy from the University of Kansas and doctor of philosophy from the Department of Pharmaceutical Health Services Research at the University of Maryland, School of Pharmacy.

Susan McClanahan, RN, BSN, is a director in the Clinical Services Group for Hospital Corporation of America (HCA). She joined the company in 1995. Through her work providing consultative and educational assistance to each of the HCA affiliates, she promotes foundational quality of care and compliance
with accreditation, legislative, and regulatory standards. A graduate of the University of Tennessee at Knoxville, Ms. McClanahan specialized in emergency department nursing for eight years. After obtaining her certification as a paralegal in 1990, she worked as a claims investigator in the risk management department at Vanderbilt University Medical Center.

**Nir Menachemi, PhD, MPH**, is an associate professor of health care organization and policy at the University of Alabama at Birmingham (UAB). His research focuses on health information technologies, patient safety, medical malpractice, and health care quality issues. At UAB, Dr. Menachemi teaches courses in strategic management, health information management, and directs the doctoral program in public health.

**John C. Morey, PhD, CHFP**, is a board-certified human factors professional and the senior research psychologist at Dynamics Research Corporation. He has more than thirty years of experience in training evaluation and conducts research in teamwork training programs for aviation, combat systems, and health care. Dr. Morey was a member of the original development team for the MedTeams® project, a joint civilian and military program to transition lessons learned from aviation crew resource management to health care. He holds a doctorate in experimental psychology from the University of Georgia.

**Jonathan B. Perlin, MD, PhD, MSHA, FACP, FACMI**, is president of clinical services and chief medical officer for Hospital Corporation of America (HCA). He holds adjunct appointments as professor of medicine and biomedical informatics at Vanderbilt University and professor of health administration at Virginia Commonwealth University. Dr. Perlin previously served as the chief executive officer of the Veterans Health Administration, where his work helped propel the nation’s largest integrated health system to international recognition for achievements in quality, safety, and use of electronic health records.

**Matthew M. Rice, MD, JD, FACEP**, is an ABEM-certified practicing emergency medicine physician who works clinically at more than 26 hospitals in the Pacific Northwest. Dr. Rice spent 22 years in the U.S. Army in various positions, retiring as a colonel in 2000 from Madigan Army Medical Center where he was department chair and program director of the Emergency Medicine Residency. He is a senior member of the American College of Emergency Physicians (ACEP), the national organization representing emergency medicine and chairs and is a member of various committees including the ACEP standards of care committee. He is on the board of directors of the National Patient Safety
Foundation. He has special professional interests in legal medicine, quality of medicine, local and national politics, and future issues in health care.

**Douglas W. Roblin, PhD.** is Senior Research Scientist with the Center for Health Research/Southeast at Kaiser Permanente Georgia (KPG) and adjunct assistant professor of health policy and management at the Rollins School of Public Health at Emory University. He is a social anthropologist with research interests in chronic disease management, health care access, social epidemiology, and association of patient-level outcomes with organizational and financial characteristics of delivery systems. Dr. Roblin has more than twenty years of experience with management and analysis of Kaiser Permanente (KP) databases and has directed a number of surveys of KP enrollees. He is KPG’s site principal investigator for three large multisite research consortia of the HMO Research Network; the HMO Center for Research and Education on Therapeutics, the HMO Cancer Research Network (CRN), and the HMO Cancer Communication Research Center.

**Daniel T. Risser, PhD**, is an experimental social psychologist with thirty years of research experience examining teams and organizations. He is a senior scientist in the Concepts and Analysis Division of VT Aeprco in Gaithersburg, Maryland. He has been a member of the American Society for Healthcare Risk Management (ASHRM), a member of the ASHRM Claim Data Gathering Task Force, and an assistant professor of organizational behavior in a business school. Dr. Risser was the lead researcher examining clinical errors in a large, 10-hospital project (the MedTeams Project) designed to improve teamwork and reduce errors in emergency departments. He has also conducted teamwork research on obstetrical delivery units and Army helicopter aircrews, conducted research on human links in weapon systems design, military command and control systems, and unmanned aerial systems (UAS), and helped to develop Human Systems Integration (HSI) policy for weapon design for the Office of Secretary of Defense.

**Mary Salisbury RN, MSN**, is a nurse commanding forty years of continuous service in operative, critical care, and emergency medicine with a current focus on safety research. A member of the original MedTeams® research team working to translate the principles of crew resource management into health care, Ms. Salisbury remains a participating author and designer of the TeamSTEPPS™ training and evaluation methodologies. As founder and president of the Cedar Institute, Inc., Ms. Salisbury provides services to both military and civilian health care organizations to translate research into practice—leader and team training,
implementation, sustainment and performance coaching, and to focus work on
the facilitating elements of team-driven safety to include simulation, evaluation,
and managing disrupting behaviors.

Paul M. Schyve, MD, is the senior vice president of The Joint Commission.
Before joining the Commission in 1986, he held a variety of professional and
academic appointments in the areas of mental health and hospital and health
system administration. A Distinguished Life Fellow of the American Psychiatric
Association, he has served on numerous advisory panels for the Centers for
Medicare and Medicaid Services, the Agency for Healthcare Research and
Quality, and the Institute of Medicine, and published in the areas of psychiatric
treatment and research, psychopharmacology, quality assurance, continuous
quality improvement, health care accreditation, patient safety, health care ethics,
and cultural and linguistic competence.

Robert Simon, PhD, has a doctorate in education from the University of
Massachusetts. He is a human factors specialist and educator with more than
thirty years experience. For the last twenty years he has specialized in research,
development, and training for high-performance, high-stress teams in aviation
and medicine. He was the principal investigator for the U.S. Army’s Aircrew
Coordination Training Program, the U.S. Air Force’s Crew Resource
Management Program, and the MedTeams® program. He joined the Center for
Medical Simulation in Cambridge, Massachusetts, as education director in
December 2002. He is the director of the Institute for Medical Simulation, a
jointly sponsored endeavor of the Center for Medical Simulation and the
Harvard-MIT Division of Health Science and Technology intended to foster
high-quality simulation-based health care education.

Donna J. Slovensky, PhD, RHIA, FAHIMA, is a professor and associate
dean for Academic and Student Affairs in the School of Health Professions at
the University of Alabama at Birmingham (UAB). Her teaching and scholarship
interests include health information management, strategic management, and
health care quality issues.

Sven Ternov, MD, is a PhD student at Lund Institute of Technology, studying
risk management in complex socio-technical systems. He is a consultant for the
Swedish air traffic navigation and a provider and consultant for the Danish
Board of Health. He previously served as an inspector for the Swedish Board of
Health and Welfare at the regional unit in Malmö.
