Certificate Programs

ISO 45001 Certificate Program - **New!**

The ISO 45001 Standard is said to be one of the most significant occupational safety and health standards to come about in decades. As an OSH professional, learning how to integrate this management system within your business can have a significant impact on your OSH program and your bottom-line. ASSE's ISO 45001 Certificate Program will give you the skills you need to bring this important standard to your organization.

To achieve the Certificate, complete within two years:

- A blended learning seminar of an online pre-seminar module and a two-day classroom seminar (1.4 CEUs)
- 14 hours of online or classroom electives (1.4 CEUs)*

See page 3 to learn more.

The ASSE Risk Assessment Certificate Program

Upon completion of this program, participants receive a Certificate in Risk Assessment that is evidence of having acquired the skills to execute a safety and health risk assessment.

To achieve the Certificate, complete within two years:

- Three days of classroom education learning risk assessment process (2.1 CEUs)
- Final project assignment to develop a risk assessment program (.9 CEU)
- 10 hours of selected electives totaling 1.0 CEU

See page 4 to learn more.

Sponsored by 

Certificate in Safety Management

Learn the fundamental concepts and process to implement the right safety management program for your organization through the Certificate in Safety Management Program. Completion of this certificate is an opportunity for career development, training and recognition.

To achieve the Certificate, complete within five years:

- Required seminars totaling 5.6 CEUs:
 - Safety Management I
 - Safety Management II
 - Corporate Safety Management
- Electives totaling 1.9 CEUs from ASSE*

See page 5 to learn more.

Certificate in the Executive Program in Safety Management - **New Edition!**

Since the original Executive Program was delivered, safety management thinking has evolved with many new concepts influencing the way safety is now being delivered. ASSE's new edition of this program will introduce you to contemporary management methods and influential leadership strategies, and teach you how to apply them to your workforce.

To achieve the Certificate, complete within two years:

- Required seminars totaling 3.5 CEUs:
 - Advanced Safety Management Methods
 - Influential Leadership Skills
- A final essay based on seminar content for .1 CEU
- Electives totaling 1.4 CEUs from ASSE*

See page 6 to learn more.

Global Safety Management Certificate Program

ASSE's global certificate program focuses on safety management practices that will enable safety professionals to establish and maintain safe workplaces anywhere in the world.

To achieve the Certificate, complete within five years:

- Required seminars totaling 2.8 CEUs:
 - Managing Safety and Health
 - Implementing a Safety and Health Management System
 - International Standards and Legal Requirements for Safety Management
- Passing Score on a final examination
- Electives totaling 2.2 CEUs from ASSE*

See page 7 to learn more.

Sponsored by

*Applicable Electives for ASSE Certificate Programs

Electives at ASSE:

- Seminars
- Webinars
- Symposia

Not applicable as electives:

- The ASSE Professional Development Conference
- Chapter and Regional education events
- Education delivered by other organizations

ISO 45001 CERTIFICATE PROGRAM

The international community, including the U.S., is working to develop the ISO 45001 Occupational Health and Safety Management Systems (OHSMS) standard, one of the most pivotal safety and health standards in decades. The final version, expected in Fall 2017, will have an impact on business practices worldwide.

ASSE is introducing the ISO 45001 Certificate Program. This certificate will prepare safety professionals to successfully implement the standard within their organizations. With the guidance and knowledge gained through the program, you will be equipped to deliver effective safety management that can be applied consistently worldwide.

ISO 45001 Certificate Program Classroom Seminar

2 Days / 1.4 CEUs

The ISO 45001 Certificate Program is a blended learning seminar comprised of an online pre-seminar module and a two-day classroom seminar. In the interactive workshop-style seminar you will learn how to implement and assess the performance of the ISO 45001 standard within your organization. Upon completion of the online learning module and the classroom seminar, you will be able to:

- Navigate the ISO 45001 standard document
- Tell business leaders a compelling story on the importance of adopting the standard
- Create an actionable plan for adoption of the standard
- Take active steps to manage your organization's risk profile
- Assess the performance of your OHSMS, in relation to the ISO 45001 standard, and continuously improve your process

Return to your organization with the knowledge and confidence to successfully implement the ISO 45001 standard via an OHSMS as an integral part of your organization's overall business operations and objectives.

The most current Draft International Standard (DIS) of the ISO 45001 standard is included in your registration.

The banner features a central logo with a circular emblem containing three stylized mountain peaks in green, red, and blue. Below the emblem is a white rectangular box with the text "SAFETY 2017" in bold blue letters, and a smaller white box below that with "ASSE" in blue. The background of the banner is grey with colorful geometric shapes (triangles) in shades of teal, yellow, and red on the left side. Below the logo, the text "ASSE PROFESSIONAL DEVELOPMENT CONFERENCE & EXPOSITION" is written in bold pink letters, followed by "June 19-22, 2017 | Denver, CO | safety.asse.org" in a smaller teal font.

THE ASSE RISK ASSESSMENT CERTIFICATE PROGRAM

Sponsored by

3 Days / 2.1 CEUs

Recognizing the importance of risk assessment as a significant skill for the safety professional, upon completion of this education program, you will receive a Certificate in Risk Assessment that is evidence of your competence in successfully applying occupational safety and health risk assessment principles.

Learn to:

- Implement the basic steps of the risk assessment process
- Conduct a risk assessment leading to the identification and prioritization of the organization's hazards and controls
- Influence management to support risk reduction plans and efforts
- Measure the effectiveness of the risk assessment process and outcomes to support the organization's objectives

Hazard Identification

You will select the appropriate resources to produce a list of hazards for the basis of the risk assessment.

Actions are:

- Hazard Identification techniques
- Accumulation and review of data
- Selection of a risk assessment tool

Risk Analysis

You will begin the process of evaluating risks and learn to use recognized methods of assessment such as checklists, hazard analysis, failure modes and effects analysis, etc.

Actions are:

- Basic steps of risk assessment
- Methods and data sources
- Qualitative vs semi-quantitative vs quantitative
- Creating and using a matrix
- Performing a baseline risk assessment

Risk Evaluation and Treatment

You will use the tools provided in this seminar to verify risk acceptability, synthesize mitigation options, create a baseline for future risk reduction comparisons and apply hierarchy of controls.

Actions are:

- Identify controls (hierarchy)
- Control Selection/decision
- Identify mitigations for risk reduction
- Key metrics for the risk assessment process

Additional Risk Assessment Resources

In addition to the virtual or classroom seminar elective education and final project, participants in the ASSE Risk Assessment Certificate Program are able to access additional resources to support their study of risk assessment. These resources are available on the ASSE Risk Assessment Institute website at www.oshrisk.org.

CERTIFICATE IN SAFETY MANAGEMENT

Safety Management I

3 Days / 2.1 CEUs

Through examples, case studies and other resources, this seminar provides a foundation of fundamental elements and techniques for managing an effective safety system.

Learn to:

- Establish accountability for safety efforts
 - Implement proven system elements and strategy
 - Satisfy the moral, financial and legal responsibilities
 - Develop policy statements and performance standards to assist the management team fulfill its safety responsibilities
 - Control Workers' Compensation costs
 - Create a budget for your safety efforts
-

Safety Management II

2 Days / 1.4 CEUs

Review case studies to learn measurement techniques with recommendations for implementation. This seminar may be taken as a continuation of Safety Management I or as a stand-alone seminar for those who wish to strengthen an existing safety management system. Bring a copy of your current policy and rules.

Learn to:

- Conduct an effective safety audit
 - Analyze the ethics of safety-related matters
 - Fulfill the expanded safety role and the expectation of your organization
 - Implement strategic safety efforts that will impact the system
 - Reinforce safety behavior in your organization
-

Corporate Safety Management

3 Days / 2.1 CEUs

Corporate Safety Management provides a forum to share challenges, craft solutions, and implement the necessary skills to be successful in positioning safety in your organization.

Learn to:

- Design your safety management system to support business objectives
- Influence and obtain management support for your safety efforts
- Demonstrate business acumen and negotiation skills
- Achieve work habits necessary for more effective safety management
- Adjust safety efforts in response to corporate mergers, downsizing, rightsizing, and reorganizing
- Benchmark your organization's safety and health system

**Completion of this certificate earns one additional
recertification point authorized by BCSP.**

For full details visit www.asse.org/csm

EXECUTIVE PROGRAM IN SAFETY MANAGEMENT

Successful completion of the ASSE Executive Program in Safety Management will further your ability to:

- Manage safety applying the methods established by recognized contemporary management innovators, behavioral scientists and great leaders in safety
- Add another dimension to OSH management in your organization by applying strategy and techniques focused on risk, business and the reality of human behavior
- Exhibit the unique traits of successful leaders to inspire your workforce in their safety performance
- Strengthen the connection with your senior leaders
- Introduce new concepts in OSH management and leadership to your workforce

Advanced Safety Management Methods

3 Days / 2.1 CEUs

This three-day seminar contains the following education elements:

- Shifting focus from compliance-driven safety
- Human factors/human error including the work of Sidney Dekker and James Reason
- Cognitive bias
- Serious injury and fatality prevention
- Risk principles
- Prevention through Design
- Aligning OSH with business operations
- Emerging management methodology of great theorists – how the work of Peter Drucker and other management authorities can be applied to OSH

Influential Leadership Skills

2 Days / 1.4 CEUs

This two-day seminar consists of the following topics:

- Communicating the value of safety to the organization
- Principles of leadership
- Leadership vision and strategic thinking
- Influencing line management
- Ethical decision making
- Identifying the strengths and weaknesses of your current OSH model
- Selecting the best model for producing long-term safety performance success
- Having your revised OSH management plan accepted and recognized by your organization

Previous Participants of the Executive Program

If you started completing the requirements for the Executive Program prior to November 1, 2016, the CEUs earned for the Executive Program certificate will still be applicable. Please see our website for details at www.asse.org/ep.

For full details visit www.asse.org/ep

GLOBAL SAFETY MANAGEMENT CERTIFICATE PROGRAM

Sponsored by

Managing Safety and Health

2 Days / 1.4 CEUs

During this seminar safety professionals will analyze the best practices of global leaders in safety, health and environmental management. From discussions and examples, you will learn methods to implement, manage and measure a successful global safety, health, and environmental program.

Learn to:

- Deliver best safety and health management approaches
- Prevent and control losses
- Manage occupational and environmental health risk
- Measure performance of safety efforts
- Maintain program quality

Implementing a Safety and Health Management System

1 Day / .7 CEU

In this seminar you will examine different safety management systems in order to identify the most appropriate system for your organization. Particular emphasis will be placed on those systems that are applicable to global organizations.

Learn to:

- Analyze systems applicable to OSH
- Select the most appropriate system for an organization's needs
- Implement a safety management system

International Standards and Legal Requirements for Safety Management

1 Day / .7 CEU

This seminar will enable the safety professional to identify the regulations, standards and legislation that pertain to OSH around the globe.

Learn to:

- Recognize roles of statutes, regulations and industry standards
- Identify and follow international legal requirements
- Identify international laws for OSH management
- Navigate legal requirements to mitigate risk

CERTIFICATION PREPARATION WORKSHOPS

Let us help you EARN and MAINTAIN your certification with ASSE's Certification Preparation Workshops. In just 3 Days, you can gain the knowledge and the confidence you need to pass your certification exams. Led by the most experienced certification instructors, Langlois, Weigand & Associates, Inc., these intensive three-day programs feature overviews of each examination domain covered by each BCSP exam. Our leaders will help you assess your current understanding of the content, identify where you need to focus your efforts, help you find the right answer and give you the confidence to pass your exam. We are so confident in our workshops, they are guaranteed. If you sit for the exam within 12 months of the workshop and do not pass, you can retake the same workshops for FREE! Guarantee is not valid with chapter or regional workshops.

Associate Safety Professional (ASP) Examination Preparation Workshop

3 Days / 2.1 CEUs

This workshop will prepare you for the BCSP's Safety Fundamentals Examination, which leads to the ASP designation. You will review more than 350 problems addressing all sections covered by the exam.

Learn to:

- Determine whether you are ready to attend the Safety Fundamental Examination
- Obtain answers to questions about Fundamentals Exam materials
- Identify areas where additional preparation is needed
- Become familiar with resources available to prepare for the exam
- Utilize information about certification requirements and scoring procedures in your test preparation
- Review content material utilizing a testing format

You will need to bring a scientific calculator TI-30X IIS to use in this workshop.

Certified Safety Professional (CSP) Examination Preparation Workshop

3 Days / 2.1 CEUs

This workshop is designed to prepare participants for the CSP Examination through lectures, sample problems, and discussion on the topics in the current CSP blueprint.

Topics include:

- Science and Math
- Management Systems
- Risk Management
- Emergency Preparedness
- Fire Prevention
- Security
- Occupational Health
- Ergonomics
- Training /Education
- Environmental Management
- Law
- Ethics

This workshop has been updated to reflect the latest revisions to the CSP Exam. The new blueprint is known at CSP9. Participants have successfully passed the ASP, or been waived since they have the Graduate Safety Professional (GSP), Certified Industrial Hygienist (CIH), or other designation acceptable to the BCSP. Visit bcsp.org for more information.

You will need to bring a scientific calculator TI-30X IIS to use in this workshop.

CERTIFICATION PREPARATION WORKSHOPS

Construction Health and Safety Technician (CHST) Examination Preparation Workshop*

3 Days / 2.1 CEUs

This seminar provides participants with a detailed review of material included on the Blueprint for the CHST Examination. Participants will complete a 200-question sample quiz as part of the workshop and will be provided additional quizzes to be reviewed when they return home.

Topics include:

- Safety program management and administration
- An overview of safety management systems including ISO and ANSI standards
- Hazard Recognition, Evaluation and Control techniques
- Managing regulatory inspections
- Training and orientation means and methods
- Hazard communication including GHS
- Jobsite inspections and audits
- Job hazard analysis/pre-job planning
- Incident investigation
- Recordkeeping requirements

*Delivered by Professional Safety Services, Inc.

You will need to bring a scientific calculator TI-30X IIS to use in this workshop.

Occupational Health and Safety Technologist (OHST) Examination Preparation Workshop

3 Days / 2.1 CEUs

The primary goal of this workshop is to help professionals pass the OHST Exam.

Learn:

- Overview of the OHST blueprint
- Study methods and exam strategies
- OHST Math problems
- Assessing Safety, Health, Environmental and Security Risk
- Hazard Control and Loss Prevention
- Verification and Continuous Improvement

You will need to bring a scientific calculator TI-30X IIS to use in this workshop.

Math Review for Certification Examinations

1 Day / .7 CEU

This workshop is specifically designed for those preparing for certification examinations (ASP, CSP, CHST, OHST) and needing a hands-on review of essential math skill areas.

Learn:

- Conversions
- Dimensional analysis
- Number manipulation
- Shapes and formulae
- Graphing
- Algebra
- Trigonometry
- Operation of a scientific calculator

Registration for this workshop includes a scientific calculator TI-30X IIS.

Calculators

Attendees will need to use scientific calculator TI-30X IIS in the Math, ASP, CSP, CHST and OHST workshops. These calculators will be provided in the Math Review seminar. ASP, CSP, CHST, and OHST attendees who do not attend the Math Review seminar need to bring their own TI-30X IIS calculator.

Global Certificate in Safety Management	

REGISTRATION AND PRICING

Four Easy Ways to Register:

1. Online at www.asse.org
2. Call +1.847.699.2929
3. Download our registration form & fax to +1.847.768.3434 or
4. Mail to ASSE, 33477 Treasury Center, Chicago, IL 60694-3400 USA

Walk-In

Class size may be limited. Please contact ASSE before registering on-site to determine if space is available.

Seminars and workshops include

- CEUs
- Workbooks for each seminar
- Beverage breaks (breakfast and lunch will be on your own)

Time Schedule

Workshops begin promptly at 8:00AM and conclude at 4:30PM each day.

Safety 2017 Professional Development Conference & Exposition

Registration fees for Pre and Post Conference seminars at ASSE's Safety 2017 may vary.

Cancellation Policy

Registrants canceling within 10 working days of the program will be refunded tuition less \$100 fee. Registrants who do not cancel and do not attend the workshop or seminar will not have tuition refunded. A \$25 processing fee will be charged for substitutions. ASSE reserves the right to substitute faculty should unforeseen events occur. ASSE reserves the right to cancel any workshop or seminar two weeks prior to presentation.

Physically Challenged

Whenever possible, arrangements will be made for physically challenged registrants provided ASSE receives 45 days advance notice. Please write a letter of explanation, your name and phone number, and attach to the registration form. ASSE will contact you.

Images

Registration and attendance at or participating in ASSE meetings or other activities constitutes an agreement by the registration to ASSE's use and distribution, now and in the future, of the registrant or attendee's image or voice in photographs, videotapes, electronic reproductions, and audiotapes of such events and activities.

ONSITE SEMINARS

Bring ASSE's World-Class Occupational Safety and Health Training to your OSH professionals.

An effective occupational safety and health training program can result in fewer injuries and illnesses, better morale and lower Workers' Compensation insurance premiums. No matter what industry you're in, ASSE has a safety and health training program that can help your organization become safer, more efficient and more profitable. ASSE instructors are leading educators and professionals. ASSE examines and evaluates each professional, ensuring the quality of instruction your organization will receive.

When your workforce has safety training needs, ASSE is ready to deliver cost-effective, high-quality, customized occupational safety and health education and training. Onsite courses can be a better use of company resources as they limit the travel expenses employees would incur. Your team is also ready to get back to work the next day instead of traveling. We can fill the niche for that specialized safety training topic or bring complete Safety Management Certificate programs, certification preparation workshops or technical seminars to your worksite. ASSE has a long-standing reputation of delivering high-level, quality OSH information that you can utilize immediately.

Categories of ASSE On-Site Seminar Offerings

- Certificate Programs
 - ISO 45001 Certificate Program
 - ASSE Risk Assessment Certificate Program
 - Certificate in Safety Management
 - Executive Program in Safety Management
 - Global Safety Management Certificate Program
- Certification Preparation Workshops
 - Math Review for Certification Exams
 - ASP Exam Preparation Workshop

LEARN ONLINE

More members are discovering the value of online learning. Access best practices at your fingertips plus earn CEUs while enjoying decreased costs and greater convenience. Here are some of our most popular on-demand virtual events:

Slips, Trips and Falls Virtual Symposium - Standards, Systems and Solutions 1.0 CEU

Take part in six sessions that explore the latest practices for eliminating slip, trip and fall hazards in the workplace.

The Rise of a Global Safety Management Standard – Getting Prepared for ISO 45001 - An ASSE Virtual Symposium

1.0 CEU

Get your organization ready to adopt this new standard by taking part in this ON-DEMAND virtual event. In it, you'll hear from people around the world instrumental in the standard's development.

- Development of ISO DIS 45001 and the next steps
- Integrating OHS Processes Into an Organization's Management System
- The importance of leadership, support and worker participation
- Planning for strategic outcomes
- Implementation Workshop – Where to begin? Context!
- Determining Adequacy and Effectiveness of an OHS MS
- Stakeholder's Panel Discussion

ON-DEMAND: A New View on Safety Incentives

1.0 CEU

In this virtual symposium, our featured presenters will discuss the successes - and challenges - they faced when trying to implement a safety incentive program that went beyond the "gift card".

- Safety Incentive Programs: How to Legally Encourage Safe Behaviors
- Use of Incentives in Safety Management: What Works and What Doesn't
- Looking In the Mirror – An Alternative View of Behavioral Incentives
- Team Based Recognitions – Utilizing Peer Motivational Techniques.
- Proactive Incentive and Recognition Programs for Valid and Reliable Injury Reduction

ON-DEMAND - Organizational Behavior: Safety Through Human Performance, Leadership, Learning, and Resilience

1.2 CEUs

Want to achieve positive safety results? Then look at the human factors. This ON-DEMAND online event - with recorded sessions from Sydney Dekker, Ron Gantt, Randy Cadieux and many others - will help you to do just that!

- Just Culture - Dr. Sidney Dekker
- Human Error from a Safety-II Perspective
- Lessons Learned or Just Lessons Available? Maybe?
- Using the CDC INPUTS™ Survey to Improve Workplace Health and Safety
- The Active Shooter Threat
- Leading Teams at the Sharp End: Creating Safety through Teamwork in High-Risk Environments
- Dispelling Myths About Human Error
- Bridging the Gap - A New Model the Research-Informed Safety Professional
- Loop Whole: Improving Safety By Closed Loop Monitoring
- Mindful Safety Conversations: Catching Drift and Weak Signals

The CSP Study Experience

1.0 CEU

So you're going for your CSP? Prepare for the exam with ASSE's online review course. Over eight hours of videos cover each domain from BCSP's CSP blueprint, and can be viewed anytime/anywhere. You can even share and receive additional information related to the CSP exam with other OSH professionals by participating in the online Study Group feature.
