Leadership 2003:
Fueling Volunteer Power

September 12-13, 2003

Volunteer leaders are the power behind ASSE. Across all levels—national, regional, chapter and section—leadership is key to helping the Society achieve its goals of advancing the technical, scientific, managerial and ethical knowledge and skills of SH&E professionals, and maintain its commitment to protecting people, property and the environment. It is the active participation and hard work of volunteer leaders that make things happen: professional development seminars and conferences, community outreach, governmental affairs, communication through newsletters and online presence, student mentoring, career enhancement and a host of other activities that ASSE groups sponsor. Without leadership, none of these things would be possible.

Recognizing this significance, ASSE holds an annual Leadership Conference, designed to bolster the leadership skills of all Society volunteers, and provide an avenue for officers to meet and interact with peers, and share ideas for solving challenges that others may also face. The conference is free—officers need only arrive. Featuring breakout sessions, workshops and focused roundtable discussions, as well as general sessions led by Society officers, the two-day conference will be held Sept. 12-13 at the Hyatt Regency O’Hare (near ASSE headquarters in Des Plaines, IL), with a welcome reception on Sept. 11.

This year, breakout sessions are organized in leadership tracks, each focusing on an office: presidents-elect/presidents; secretaries; treasurers; chapter leaders; and practice specialty leaders. Roundtables will cover various topics, including educational activities, funding strategies, member participation, needs assessments, and recruitment and retention. A variety of workshops will also be offered, covering topics such as website and newsletter development, generational synergy, governmental affairs, student section development, long-range planning and public relations. In special sessions, ASSE President Skipper Kendrick, CSP, and Executive Director Fred Fortman will provide an overview of the Society’s structure, while President-Elect Gene Barfield, CSP, will discuss “Team ASSE” local to national. This year’s program will also feature a keynote address, “Encouraging Volunteer Power,” by Carl Koetter, founder of Koetter Training Resources LLC, a consulting firm that provides training in the areas of management and professional development, interpersonal skills and performance management.

“It will be exciting to learn from the best chapters in the country,” says Conference Chair Glenn Young, CSP, OHST. For more information or to register for the conference, visit www.asse.org or call ASSE’s Customer Service Dept. at (847) 699-2929.
Awards & Honors

Outstanding Safety Educator Award

Established last year, the ASSE William E. Tarrants Outstanding Safety Educator Award, sponsored by PPG Industries Inc., is presented annually in order to recognize exemplary achievements in SH&E education. The award is named for William E. Tarrants, a past Society president, ASSE Fellow and noted pioneer in safety education. Recipients are nominated by their immediate supervisor, students and colleagues, including chapters, regional operating committees, practice specialties, councils, standing committees or board of directors. Recipients are chosen for their high quality of teaching; SH&E research and publication activity; leadership, support, participation and recruitment for ASSE student sections; and university or organizational contributions.

This year’s recipient is Mark A. Friend, Ed.D., CSP, a professional member of the Cape Canaveral Chapter, and professor and chair of Applied Aviation Sciences at Embry-Riddle Aeronautical University in Daytona Beach, FL. Serving as faculty advisor to ASSE’s local student sections, Friend is an active member of the ASSE Academics Practice Specialty and Chair of the Professional and Educational Standards Committee. He also served as an executive committee member of the Applied Science Commission of the Accreditation Board for Engineering and Technology.

Prior to joining Embry-Riddle, Friend served as professor in occupational safety at East Carolina University, Greenville, NC, and as adjunct professor in the School of Tropical Medicine at Tulane University, where he taught an online safety management course. Friend also chaired the Dept. of Occupational Safety and Health at Murray (KY) State University, and has taught at West Virginia University, Morgantown, Fairmont (WV) State College and Waynesburg (PA) College. He earned a B.S. in Business Administration, an M.S. in Industrial Relations and an Ed.D. in Safety Management, all from West Virginia University. In addition, Friend has published numerous articles, including several in Professional Safety.

President’s Awards

Via the President’s Award, the current Society president can recognize individuals whose outstanding service has positively impacted the Society and its mission. The award is generally for a singular achievement, but can recognize dedication to a series of issues that bring national exposure to ASSE and its mission. 2002-03 President Mark Hansen recognized four individuals this year.

Professional member of the Northeastern Illinois Chapter Jeffrey C. Camplin, CSP, CPEA, was honored for his outstanding performance representing the U.S. EPA’s Lead Outreach program, which is designed to enhance safety and health through improved lead-based paint remediation. Over the years, Camplin, who is president of Camplin Environmental Services Inc. in Rosemont, IL, has contributed to the (continued on page 3)
President’s Awards
(continued from page 2)

Society and profession by serving as the Environmental Practice Specialty Assistant Administrator, chair of the Environmental Practice Specialty membership committee, key coordinator of the Environmental Practice Specialty “Knowledge Network,” Council on Practices and Standards Website Committee Chair, and a presenter at past ASSE leadership conferences. Camplin is also a member of the Academic, Consultants, Construction, Environmental, Healthcare and Management practice specialties.

Chesapeake Chapter professional member Emory E. Knowles III, CSP, CIH, was awarded for his major role as ASSE’s Governmental Affairs Committee Chair. His diligence and tireless efforts have led to the crafting of many letters and position statements. “His ability to facilitate committee discussions and form a consensus is outstanding,” notes 2002-03 ASSE President Mark Hansen, P.E., CSP, CPE. In addition, Knowles serves as one of the Society’s public relations spokespeople. “No matter how busy he is or where he is, he responds immediately to an ASSE call for assistance,” says Hansen. Knowles, manager, industrial hygiene and safety, Northrop Grumman Corp., Baltimore, is a member of the Engineering, Industrial Hygiene and Management practice specialties.

Rixio E. Medina, CSP, manager, corporate health, safety and security, for CITGO Petroleum Corp., a professional member of the Tulsa Chapter and an Engineering Practice Specialty member, was recognized for successfully representing ASSE at the 2000 North American Occupational Safety & Health Week meeting in Mexico City; at the 2002 Mexican Assn. of Mechanical Engineers’ Safety Conference in Guadalajara, and at safety conferences with the U.S. Dept. of Labor, secretaries of labor, business leaders and labor unions in Belize, Guatemala, Nicaragua and Honduras. These efforts have advanced the Society’s endeavors to develop closer ties internationally with Mexico, Central and South America, and to enhance the value of occupational safety and health.

Everett A. Beaujon, CSP, CHMM, who recently passed away after a battle with cancer, was honored for dedicating his life to safety. Having spent 40 years contributing to the field, Beaujon was key to driving safety and health to its current position of prominence at Austin Industrial Inc., where he worked for more than 20 years. He was part of a vanguard movement when OSHA’s Voluntary Protection Programs was created. “[Beaujon] was a man of character and integrity, kindness and compassion,” says Hansen. “[He] is sorely lost but will be remembered well as an example to follow.” Beaujon was a professional member of the Gulf Coast Chapter.

ASSE Recognizes Excellence in Writing

Each year, ASSE’s Editorial Review Board selects the best original member-written articles published in Professional Safety. The recipients of this year’s Professional Paper Awards are Bruce W. Main, P.E., CSP, and Martin H. Finkel, CIH, CMC.

Main was recognized for two articles. The first-place paper, “Design Reviews: Checkpoints for Design,” explains the basics of the design review process and the SH&E professional’s role in that process. Featured in the January 2002 issue of PS, the article stresses that SH&E professionals should be involved in the early stages of design to ensure a safe process. His second article, “Risk Assessment Is Coming: Are You Ready?” appeared in the July 2002 issue. This article focuses on the importance of risk assessments in the machine tool industry. A member of ASSE’s Greater Detroit Chapter, Main is president of Design Safety Engineering, an Ann Arbor, MI-based consulting firm that specializes in safety through design.

Finkel’s article, “Anatomy of a Confined Space Fire: A Case Study and Lessons Learned,” received third place; it was featured in the May 2002 issue. The article explores the factors that led to confined space fire in a petroleum tank. It provides a detailed walkthrough of the incident and discusses ways to prevent similar accidents. With more than 22 years’ experience in confined space safety, Finkel is principal at Environmental Safety and Health of Alaska, a safety and industrial hygiene consulting firm based in Anchorage. At the time the article was published, Finkel was a professional member of ASSE’s Alaska Chapter.
Awards & Honors

Region SPYs

This year’s regional Safety Professional of the Year (SPY) award winners were honored during ASSE’s annual House of Delegates meeting for their dedication, professional competency and outstanding contributions to the Society. Recipients are selected by their respective region vice president.

CoPS SPY

E.L. “Brownie” Petersen, CSHM Management Practice Specialty Utah Chapter ATK Thiokol Propulsion Brigham City, UT

Public Sector

Sedigheh P. Sharifpour, CSP Pensacola Chapter Florida Dept. of Transportation Tallahassee, FL

ASSE’s annual safety Professional of the Year (SPY) awards provide each practice specialty an opportunity to pay tribute to Society members who have made exemplary contributions to their respective practice specialty. The award acknowledges members’ professional competence and dedication to the mission and goals of their specific practice specialty. Ten of ASSE’s 13 practice specialties selected SPYs this year, with the Environmental Practice Specialty selecting two.

American Society of Safety Engineers
Newest ASSE Symposia Announced

Construction Safety Event to Examine “What Works”

One of every five workplace fatalities is a construction worker. Fatalities in the construction industry increased six percent in 2001 to a record high. These statistics provide a stark reminder that there’s a long way to go to reduce the many hazards that construction workers face each day.

Doing so requires moving beyond compliance, toward a commitment to management practices proven to be successful in safety. To help SH&E professionals achieve that goal, ASSE is offering a Construction Safety Leadership Symposium Oct. 16-17 in New Orleans. The program will focus on what works, with an emphasis on best practices in safety management and in handling technical challenges. Attendees will gain ideas for implementing successful safety management strategies; learn about the latest OSHA activities; and interact with safety leaders from the industry.

Introduction to Fall Protection, Third Edition

J. Nigel Ellis, Ph.D., P.E., CSP

This book offers specific aid in the identification of specific walking and working surface hazards, including slips and trips, stairways and ramps, ladders, scaffolds and roofs. The book’s sample fall protection program outlines the essentials of a new program, and provides an audit and program evaluation for established programs. (Order #4380)

Cone Hazards & Their Prevention

David V. MacCollum, P.E., CSP

This publication presents 50 categories of crane hazards, including power line contact, types of upset, and pinch and nip points; it is useful for anyone involved in crane design, operation or maintenance, or operator training. (Order #4348)

OSHA Standards for Construction Industry (29 CFR Part 1926)

Book (Order #10209) CD-ROM (Order #10209CD)

Fatalities in the construction industry increased six percent in 2001 to a record high. These statistics provide a stark reminder that there’s a long way to go to reduce the many hazards that construction workers face each day.

Doing so requires moving beyond compliance, toward a commitment to management practices proven to be successful in safety. To help SH&E professionals achieve that goal, ASSE is offering a Construction Safety Leadership Symposium Oct. 16-17 in New Orleans. The program will focus on what works, with an emphasis on best practices in safety management and in handling technical challenges. Attendees will gain ideas for implementing successful safety management strategies; learn about the latest OSHA activities; and interact with safety leaders from the industry.

In addition to a keynote address by John Mayo, Ph.D., who will show attendees why It’s Time to Get MADD about Workplace Accidents and Deaths, the program will feature three general sessions:

2. Attendees will choose from three educational tracks: safety management approaches; best practices and lessons learned; and leadership opportunities.

3. Sessions include: Utilizing Leading Indicators to Improve Contractor Safety Performance; Maintaining Pro-Safety Behavior in the Construction Industry; Scaffolding

Keynote address by John Mayo, Ph.D., who will show attendees why It’s Time to Get MADD about Workplace Accidents and Deaths, the program will feature three general sessions:

2. Attendees will choose from three educational tracks: safety management approaches; best practices and lessons learned; and leadership opportunities.

3. Sessions include: Utilizing Leading Indicators to Improve Contractor Safety Performance; Maintaining Pro-Safety Behavior in the Construction Industry; Scaffolding

Law Symposium Offers Strategies for Reducing Liability

Today’s headlines are filled with stories of companies that are found liable for various offenses—from damaging the environment and polluting waterways to personal injuries caused by faulty products or poor work practices. SH&E professionals can help their employers avoid these problems by understanding the legal system and how to reduce exposure to liability.

ASSE’s latest education event, The Law Symposium for the Safety, Health & Environmental Professional, speaks to that need. Slated to run Nov. 20-21 at the Wyndham Bonaventure Resort in Ft. Lauderdale, FL, the symposium is designed to help attendees respond to SH&E concerns as they relate to liability. Participants will learn how to incorporate the principles of civil law into best management practices; direct policy and decision making to minimize legal exposure; and understand how the law impacts occupational safety and health.

The program will begin with a review of the fundamentals of the law and the American legal system, then move into an examination of the four elements of negligence and ways to defend against negligence actions. Workers’ compensation, risk management principles and liability insurance will also be addressed, as will the SH&E professional’s role in mitigating claims against the organization. In addition, attendees will learn about the components of a lawsuit, the discovery process and rules of evidence, and expert testimony and impeachment. The two-day event will conclude with a mock trial.

Attendees will receive 1.2 CEUs/CoCs or 2.0 Safety CM points. The early registration deadline is Sept. 15; final registrations are due Oct. 10.

Program & Registration Information

To view the complete programs of these symposia or to register online, visit www.asse.org and select the Professional Development & Education link. You may also contact ASSE’s Customer Service Dept. at (847) 699-2929; customerservice@asse.org.
ASSE Certificate Programs Offer Career Development

Certificate in Safety Management

ASSE’s Certificate in Safety Management program consists of three required courses and various electives. To receive the certificate, participants must earn a total of 7.5 CEUs, and all courses must be completed within a five-year period. Earning ASSE’s Certificate in Safety Management is an excellent way to advance your career.

Executive Program in Safety Management

A certificate from ASSE’s Executive Program in Safety Management and illustrates a practitioner’s commitment to professional development. The program is designed to help SH&E professionals demonstrate safety system success and gain a career advantage. It targets experienced SH&E professionals; CSPs and CIHs who need a relevant course of study while obtaining CoCs and CM points; and senior SH&E professionals who want to explore a new avenue of education. Participants receive the certificate after earning a total of 7.5 CEUs for completing three required seminars (4.9 CEUs)—Delivering a High-Performance Safety Management System, Reducing Losses from Occupational Health Risks and Environmental Exposures, and Managing the Business Aspects of a Safety Program—and additional ASSE national seminars or symposia (at least 2.6 CEUs).

For more information, visit www.asse.org or contact ASSE’s Customer Service Dept. at (847) 699-2929.

Recent Recipients of the Certificate in Safety Management

Michael Arnold Acuña, safety manager, Jacobs Engineering Group Inc., Houston
Gilbert Balderas Jr., corporate senior EH&E representative, Symbol Technologies Inc., McAllen, TX
Daniel S. Banta, safety representative, Pearson Educational Measurement, Cedar Rapids, IA
Jaime M. Britt, safety manager, Fresh Express, Salinas, CA
Stephen F. Collins, president, Safety Educators Inc., West Palm Beach, FL
Jonathan Cramer, chief engineer/safety officer, St. Luke’s Episcopal Health System, Woodlands, TX
Kenneth G. Davis, safety, occupational, health, environmental & fire manager, U.S. Navy, Hagerstown, MD
Cynthia Dekker, system safety manager, Lockheed Martin, Littleton, CO
David J. DeMasi, senior safety consultant, Connexis, Hockessin, DE
Nikola Dragicevíc, safety engineer, Crosco Integrated Drilling & Well Services Co. Ltd., Zagreb, Croatia
Jerry R. Geils, senior safety engineer, Autoliv ASP Inc., Ogden, UT
Millard P. Griffin Jr., regional H&S manager, URS Corp., Canton, GA
Jared R. Henthorn, industrial hygienist, SEA Consulting, Ft. Lauderdale, FL
Eric A. Kallenburg, field safety specialist, Whole Foods Market, Austin, TX
Steven J. Long, safety professional, United Space Alliance, Houston
Robert Gerard Magni, safety director, Staffmark, Little Rock, AR

Recent Recipients of the Executive Certificate in Safety Management

John G. Bienkowski, corporate safety officer, Pacifica Services Inc., Pasadena, CA
Kevin D. Burley, safety, health & environmental manager, Cabot Corp., Midland, MI
Kenneth G. Davis, OSH manager, U.S. Navy, NAVSEA, Hagerstown, MD

Michael G. Knight, manager, radiation safety, BWXT Pantex, Amarillo, TX
Jon V. Lessard, CSP, deputy director of ESHQ, Jacobs Sverdrup, Tullahoma, TN
Larry W. Mecom, CSP, manager, corporate safety, Lower Colorado River Authority, Austin, TX

Dennis W. McMickens, director, corporate safety & CSO, Roadway Express Inc., Akron, OH
Ronald Niblock, UAW health & safety representative, General Motors-Lansing, Dewitt, MI
Daniel E. O’Farrell, Leveet, PA
Gregory D. Richardson, senior EHS specialist, Aventis Pharmaceuticals, Pleasant Hill, MO
Mary A. Stanley, safety specialist, U.S. Postal Service, Grandville, MI
Suzanne M. Stubbs, safety reporting coordinator, Delta Air Lines Inc., Atlanta
David A. Van Oosterwyk, safety supervisor, Bechtel Jacobs Co. LLC, Chillicothe, OH
Janis Rachelle Wenzel, safety professional, United Space Alliance, Houston
Chapter News & Notes

2001-2002 Chapter Achievement Program Awards

The Chapter Achievement Program (CAP) honors chapters that have provided their members with superior programs to aid professional advancement. Eligible chapters must meet requirements such as membership, administration, financial, meeting and communication responsibilities.

Winning chapters are selected each year by the Society’s region vice presidents (RVPs). CAP awards are presented at the Professional Development Conference for the fiscal year two years prior. The 2001-2002 recipients are listed below with their respective RVPs.

Region I: Brian A. Clarke, CSP
Bakersfield
Midnight Sun
Los Angeles
Valley Costal
Inland Northwest
Lower Columbia Basin
Orange County
Puget Sound
Sacramento
San Francisco

Region II: Sam Lybarger, CSP, Ed.S.
Arizona
Colorado
Four Corners
New Mexico
Sierra Nevada
Southern Arizona
Southern Nevada
Snake River
Utah

Region III: Michael W. Thompson, CSP
Gulf Coast
Oklahoma City
Sabine Neches
Southwest
South Texas
Central Texas

Region IV: John S. Fleming, CSP, OHST
Central Florida
Florida Suncoast
Puerto Rico
Gold Coast
West Florida
Cape Canaveral
Alabama
Augusta
Georgia
Gr. Baton Rouge
Mississippi
Southern Mississippi
Mobile
New Orleans

Region V: Jack R. Vetter, P.E., CSP
Northeastern Illinois
St. Louis
Central Illinois
Heart of America
Gr. Chicago

Region VI: Frederick A. Miller, CSP
Gr. Tidewater
Chesapeake
Triad

Region VII: Darryl C. Hill, CSP
Central Indiana
Gr. Detroit
Louisville
Kitty Hawk
Northern Ohio
Chattanooga Area

Region VIII: Jim E. Fix, CSP, ARM
Northeastern Pennsylvania
Connecticut Valley
Long Island
New Jersey
Gr. Boston
Western Pennsylvania

Three Rivers Chapter Helps Habitat for Humanity

To bring safety to the community, ASSE’s Three Rivers Chapter member William Lauer helped form a relationship with Will County Habitat for Humanity International’s Executive Director Barbara Birchler.

Habitat for Humanity is a nonprofit Christian organization dedicated to eliminating poverty housing. It builds affordable houses that are sold to those in need at no profit, through no-interest loans. Birchler wanted to ensure that Habitat workers followed safe work practices, a difficult task since the homes are typically built by experienced craftspersons guiding a large number of inexperienced volunteers.

On May 31, ASSE and Habitat representatives met and accomplished several tasks:

- Delivered carbon monoxide and smoke detectors (where needed) to 10 current Habitat homeowners.
- Met with Habitat’s construction manager and project coordinators from local churches to discuss safety meeting outlines, injury reporting and investigation, insurance and contractual requirements, and project-specific safety needs.
- Presented Habitat with $1,700 worth of PPE, first-aid kits, fire extinguishers, tools and supplies.
- Offered assistance through on-site visits, 10-hour OSHA construction outreach training and first-aid/CPR training as needed for the volunteers.

Golf Tourney Donates Proceeds to ASSEF

On June 3, the Greater Tidewater Chapter and the Colonial Virginia Chapter teamed to host a golf tournament held in conjunction with the Annual Virginia Occupational Safety and Health Conference sponsored by the Virginia Dept. of Labor and Industry in Portsmouth, VA.

Forty-eight golfers competed in a Florida best ball format. Chair Roy Ward of the Greater Tidewater Chapter and co-chair Kelley Dalton of the Colonial Virginia Chapter announced that the proceeds of the tournament—$1,111.11—would be donated to the ASSE Foundation.
ASSE Launches New Members Only Website

The new Members Only section of the ASSE website is now available. The site features a variety of networking, career development and informational tools and resources, such as an online membership directory; bulletin boards; the new A-List listserv and the Career Center, which offers job search/posting tools, resume assistance and mentoring resources. Members can also access PS Online, view best practices articles from ASSE’s conference proceedings and download the Society’s white papers on various topics. In addition, the site features an online dues payment option. Visit the site at www.asse.org; select the Members Only tab, then provide your member number and last name when prompted. For information regarding the site, contact Geri Golonka at (847) 768-3435; or send an e-mail to ggolonka@asse.org.

President Bush Appoints Medina to CSB

President Bush has nominated Rixio E. Medina, CSP, of ASSE’s Tulsa Chapter, to be a member of the U.S. Chemical Safety and Hazard Investigation Board (CSB).

Medina currently serves as manager, corporate health, safety and security, for CITGO Petroleum Corp. and is a member of OSHA’s National Advisory Committee on Occupational Safety and Health. A long-time member of ASSE, Medina has been active in government affairs as a member volunteer, including representing ASSE at various safety events in South America and Mexico. He was also recently elected ASSE’s Vice President of Professional Affairs; in that role, he chairs the Society’s Council on Professional Affairs, to which ASSE’s Government Affairs Committee reports. Once the nomination is confirmed by Congress, Medina will step down from his elected role with ASSE. The White House press release is available at www.whitehouse.gov/news/releases/2003/06/20030625-13.html.

Greenhill Receives Columbia-Willamette SPY

Ken Greenhill, ASP, member of ASSE’s Columbia-Willamette Chapter, was named outstanding safety professional for the state of Oregon at the 2002-03 Governor’s Occupational Safety & Health Conference in Portland, OR. Greenhill works for the Associated General Contractors and has been an active member of the Columbia-Willamette Chapter. He has also served as treasurer and in other key chapter positions.

Long-Service Recognition

ASSE recognizes the following members with anniversary dates from March to August 2003. Thank you for your many years of dedication service to the Society. Members are listed by name and chapter affiliation.

50 Years

James A. Cash, West Florida

2003 Member-Get-A-Member Campaign

Make a Connection

This year, your chances of winning ASSE's member-get-a-member campaign are five times greater. The challenge provides an excellent opportunity to expand your network of resources while helping ASSE enhance its member benefits. Plus, you are eligible to win one of the following five prizes:

- big-screen TV†;
- home theater system‡;
- $1,000 shopping spree at Amazon.com;
- digital camera;
- palm pilot.

How do I win?

For each new member you sponsor (excluding student or emeritus) your name will be entered into a drawing to win one of these prizes. The Society makes recruitment easy. Use the “refer a friend” tool on ASSE’s website to send e-mails to colleagues; download an application and cover letter from the website; or call ASSE’s Customer Service Dept. at (847) 699-2929 for a supply of applications.

What makes ASSE so great?

As an active SH&E professional—whether a fresh-faced college grad or an industry veteran—you know that connecting with others in your field is paramount to your success. While hectic work schedules and geography can make networking complicated, ASSE can help bridge the proverbial gap. “As a member of ASSE, I have discovered a wealth of resources in my fellow members and in the staff,” says Terrie Norris, CSP, ARM, CPSI, Calabasas, CA, a professional member of the Orange County Chapter. “They have provided answers, guidance, tools and direction in helping me solve some of my toughest safety, health and environmental challenges.” Norris adds, “Being active as a member in my local chapter and in my region has allowed me to hone my leadership skills, which has made me a greater asset to my employer and to my clients.”

When will the winner be announced?

The campaign runs through March 31, 2004, and the winner will be announced in May 2004.

“ASSE membership provides value that allows me to be a better safety professional and achieve greater on-the-job results,” says Darryl C. Hill, CSP, Auburn Hills, MI, current Region VII Vice President. “Networking, educational opportunities and leadership development are key membership benefits. ASSE membership is an investment in your future.”

*ASSE reserves the right to substitute prizes of equal value.
†The winner of the big-screen TV will choose a model from a local vendor; maximum value is $2,500 including shipping, handling and taxes.
‡The winner of the home theater system will choose a system from a local vendor; maximum value is $1,000 including shipping, handling and taxes.

Z87.1 Audio Conference to Take Place Aug. 18

ANSI recently approved the final revision to the Z87.1 Standard, Practice for Occupational and Educational Eye and Face Protection. This standard sets forth criteria related to the description, general requirements, testing, marking, selection, care and use of protectors to minimize or prevent injuries from hazards such as impact, nonionizing radiation and chemical-type injuries in occupational and educational environments including, machinery operations, material welding and cutting, chemical handling and assembly operations.

To familiarize SH&E professionals with the revised standard, ASSE is hosting an audio-conference on Monday, Aug. 18, from 11:00 am to 12:30 pm CDT. Speakers will include Dan Torgersen, Vice Chair of the Z87 Committee, and Jack Hirschin of Oberon Co., a manufacturer of protective eyewear and equipment. Participants will receive copies of both the old and new standards, a presentation paper, a PowerPoint presentation and an audio CD of the call. Cost to ASSE members is $85; cost to AIHA/ACHMM members is $95; list price is $105. Call materials will be sent to participants via U.S. mail or e-mail prior to the call to allow them time to submit questions via a private e-mail address. Q&A will be posted to a private website for participants only.

The final publication of the standard will be announced at www.asse.org in the Standards Development section. To register for the audio-conference, contact ASSE’s Customer Service Dept. at (847) 699-2929.
