

On Friday, October 15, 2010, the Birmingham Section of the Society of Women Engineers (SWE) and the Women in Safety Engineering (WISE) group of the American Society of Safety Engineers (ASSE) held a joint meeting. About 24 people were in attendance with about 25% of the attendees being ASSE/WISE members, some of which travelled from Auburn University for this occasion. The meeting was set as a Lunch & Learn format where attendees were encouraged to bring their own lunch

with beverages and desserts provided by SWE. This format worked very well as there was a minimal financial investment by the hosting organization, as well, there was a minimal effort required to organize the event. A brief SWE business meeting was held, followed by an informative presentation on “Designing for Safety” by Ms Dana Claburn, Design General Manager, Southern Company Services. PDH’s were available for this presentation which added to it’s attractiveness to the general membership. It was a very successful event.
